EDUCATION

Bachelor of Technology in Computer Science and Engineering , Mediacaps University

Specialization in Artificial Intelligence

Expected 2026

Relevant Coursework: Data Structures , Data Base Management System , Object Oriented Programming , Artificial Intelligence , Computer Networks

SKILLS

Technical Skills JavaScript , React , Redux , Node.js , HTML , CSS , SQL , C++

Soft Skills Fast Learner , Team Work, Communication

Framework Express , Tailwind CSS , Bootstrap

PROJECTS (Latest)

KAL-Tak News App : This React-based News App allows users to stay informed with the latest headlines. The app fetches real-time news from newsapi.org and features a user-friendly interface with both light and dark theme options. In addition to news updates, it displays the current weather for any location. Users can easily search for specific news articles using the search bar, providing a personalized news browsing experience. This project highlights my skills in React, API integration, and responsive design. ([Git Hub Link](#))

Khata-Book App : This KhataBook app, developed using React, helps users manage their daily transactions seamlessly. It allows users to store, view, and update their transaction records, making it easy to track financial activities. With an intuitive interface and smooth functionality, this app is designed for efficiency and ease of use. This project showcases my skills in React, component-based development, and managing data dynamically. ([Git Hub Link](#)) ([Deployment Link](#))

To-Do App : This To-Do App, built using React, helps users organize their daily tasks effectively. It allows users to add, edit, and delete tasks, making task management simple and intuitive. The app is designed with a user-friendly interface, ensuring a smooth experience for managing to-do lists and keeping track of priorities. This project demonstrates my ability to develop practical, state-driven applications in React .

EXPERIENCE

MERN Stack Developer Intern

E-Skills Indore (July 2024 - Present)

- Designed and developed dynamic, responsive user interfaces using **React.js**.
- Optimized UI/UX to enhance performance and **improve user engagement**.
- Implemented **state management** using Context API/Redux for efficient data handling.
- Integrated RESTful APIs with frontend components for seamless interaction.

ACHIEVEMENT

Quasar2.0 Hackathon Runner-Up

- ❖ Competed among **201** teams from **40** colleges across **12** states in the prestigious Quasar2.0 Hackathon, organized by 47 Billion.
- ❖ Developed **MetaMind**, an AI-powered platform that bridges academia and industry by offering real-time course recommendations (integrating YouTube and Coursera APIs), AI-based interviews (with speech-to-text and text-to-speech features), and personalized roadmaps and assessments. ([Git-hub link](#)) , ([demo here](#))
- ❖ Utilized technologies such as React, Node.js, and advanced API integrations to gamify learning and enable students to build verified portfolios and gain job-ready skills.
